

9th May 2024

Dear Parents / Carers,

As part of our Learning for Life education (previously PSHE) the Term 6 topic every year is 'Changing Me'. Each year group will cover a different range of **age-appropriate learning** about coping positively with change.

Statutory teaching about how and why our body changes as we grow during our Learning for Life lessons is one way in which schools approach the safeguarding of children. This knowledge has been statutory in Primary schools since September 2020 to empower children with the right information to understand the changes that are happening to their bodies (inside and outside), and help them to make healthy, informed decisions throughout their lives. This includes correctly naming some private body parts from Year 1 onwards as the correct terminology is crucial for children to understand and feel confident about their bodies. It also gives children the correct language to accurately voice any safeguarding concerns. The content for your child's year group is detailed below.

Term 6 'Changing Me' teaching and learning in Year 5

Below is the 'knowledge' and 'social and emotional skills' we will teach.

*Statutory Relationships and Health Education content including puberty is highlighted in yellow.
Non Statutory Sex Education is highlighted in blue.*

- Awareness of own self-image and how body image fits into that. The children will talk about what they like about themselves and their peers.
- Describe how the bodies of those born female and those born male change during puberty and the importance of looking after oneself physically and emotionally. We discuss how puberty is a natural process that happens to everybody and how it will be OK.
- Sexual intercourse leads to conception.
- Some people may need help to conceive and might use IVF.
- Identify what they are looking forward to about becoming a teenager and understand that this brings growing responsibilities
- Identify what they are looking forward to or worried about when they move to Year 6.

All lessons are taught using simple, child friendly language and pictures, which help children understand the changes more effectively. In some KS2 year groups, some lessons may be taught separately to boys and girls to ensure all children are comfortable and that they fully engage with the lesson. Any images used have been sensitively chosen in response to previous parent consultations. Some content is also included as part of the statutory science curriculum. The Department for Education guidance states : At key stages 1 and 2, the National Curriculum for science includes teaching about the main external parts of the body and changes to the human body as it grows from birth to old age, including puberty.

You are unable to withdraw your child from any teaching that falls within the **statutory science curriculum or statutory relationships and health education**. At BRCA, the content in all lessons from Year 1 to Year 4 is statutory as sex education is not taught in these year groups.

However, you have the right to withdraw your child from the non-statutory elements of sex education, which is understanding *how* human reproduction happens. At BRCA, this applies to one lesson in Year 5 (see above highlighted in blue) and one lesson in Year 6.

If you have any further questions, we would like to invite you to a **drop in session on Thursday 23rd May between 9am and 10am.**

Alternatively, please email katie.stienlet@bannermanroadbristol.org for further information or speak to your child's teacher.

Kind regards,

Katie Stienlet
